THE SANITARIUM FOR NERVOUS AND GENERAL DISEASES is beautifully situated near the town of Livermore, 30 miles from San Francisco, and is surrounded by handsome grounds. It is isolated, the rooms are large and well furnished and the Sanitarium is specially adapted for the treatment of Neurasthenia, Nervous Dyspepsia, the Alcohol Habit and Morphomania. One building is especially adapted for Massage, Electricity, Hydrotherapy and Sun Bath. Terms \$20 to \$35 per week.

Address J. W. ROBERTSON, M. D., BOX 75, LIVERMORE, CAL.

SAN FRANCISCO OFFICE, 751 SUTTER ST. (Tuesdays and Fridays, 12:30 to 3:00 P. M. Telephone Private Exchange 751)

THE DEPARTMENT FOR THE TREATMENT OF MENTAL DISEASES is entirely separated from the Sanitarium and is located in grounds absolutely private. The central building is surrounded by small cottages for the better segregation of patients. The best-trained nurses are employed and all modern appliances for the proper care of the insane have been provided. Absolutely no restraint nor enclosures for patients. Terms \$25 to \$50 per week, depending upon the number of nurses required.

A. M. A. Principles of Ethics:

"It is equally derogatory to professional character for physicians to dispense or promote the use of secret remedies."

EDITORIAL NOTES.

On page 70 will be found a statement from the Publication Committee which we most respectfully urge upon your careful consideration. It has been said that we, who are in charge of your JOURNAL, have made misstatements and misrepresentations in connection with the matter of what is and what is not proper advertising and in our criticisms of the *Journal of the American Medical Association*. In making these criticisms we have been actuated by two motives. First, we have regarded and do now regard it as our plain duty to do all within our power to aid in correcting one of the worst, if indeed not the very worst evil in medicine—the use and promotion of the nostrum. Second, we found, almost at the beginning, that all effort toward correction was seriously obstructed by the persistent manner in which the *Journal A. M. A.* did not abide by the reasonable rule first made in 1895 by the Board of Trustees. Just what we mean is clearly shown by the following extract from an editorial which appeared in the *Virginia Medical Semi-Monthly* for January 13, 1905. The editorial dealt with proprietary mixtures and with the proposed Association of State Medical Journals with the object of trying to correct some of the abuses of medical advertising:

"It is a well-fixed principle in good government that the servant must not be above his master. As long as the *Journal of the American Medical Association* accepts such advertisements, it is idle foolishness for the smaller journals—the so-called State Journals—to say that they will not."

It is rumored that the legislators at Sacramento have gone crazy, and there seems to be some ground for the rumor. The anti-vaccination bill passed the Senate and we learn that it is very liable to pass the Assembly, though at the time of writing the final result is not known. Messrs. Haskins, McKee, Rambo and Pendleton of the Senate Committee on Public Health and Quarantine, recommended that a bill authorizing a Board of Examiners of the "Naturopathic" school (?) be passed, and it was promptly ordered on the file for second reading. If the bill should become a law there is no known form of quackery that would not be licensed in California. The bill, in several places, refers to "a recognized college of naturopaths;" did anyone ever hear of such? Candidates may be examined by the board in the following subjects: Anatomy, physiology, chemistry, botany, gynecology, obstetrics, *knifeless or orthopedic surgery, hydrotherapy, electricity, massage, chiro-practice, medical gymnastics, chromopathy, and suggestive therapeutics!* One wonders why eddyism and magnetic healing were omitted! And imagine a committee of men having sufficient intelligence to be elected to make our laws, recommending that such utter and awful rot "do pass" and become a law of the State! There are about the usual number of cinch bills and somewhat more than the usual number of foolish bills on the list. Quite a few of the proposed laws relate more or less to things medical, but few of them are of any particular importance. There are numerous measures intended to prevent adulteration and misbranding of foods and drugs, and most of them are good, but if they are passed, the State has not enough money to enforce them, even if it desired to do so. Two bills to provide for registration of nurses have been introduced; one provides for a board to be drawn from the State Nurses' Association, and in the other the board is to be selected by competitive examination. The former, Assembly Bill No. 452, is by far the better measure. Assembly Bill No. 267, emasculating the present medical law, is, at the time of writing, still in committee, where it should remain; no better burial place for a most vicious bill could be found. It would be a sorry day for the people of California if the measure should become a law. It is difficult to prophesy what will and what will not be enacted, for, as we have said, it is strongly probable that a large number of our legislators have gone crazy.

After the above was in type word was received that the anti-vaccination bill passed the Assembly by a vote of 42 to 35. It is therefore up to the Governor.

A NEW JOURNAL.

Dr. Martin Cooley of Savannah, Ga., has started a new journal under the title of "*The Georgia Practitioner*." It is well gotten up, printed in a business-like way and the editorials are refreshingly above the average. Dr. Cooley expresses himself remarkably well, and we are very glad indeed to see that he objects to the frightful mishandling of good English so common in medical talking and writing. In regard to the policy of the Journal, he says:

"Our advertising shall be strictly ethical, and absolutely confined to our advertising pages. No advertiser will buy his way into our reading-matter pages. The profession is being educated to this disgraceful and too prevalent practice, and are properly casting out these subsidized sheets; and the time is not far distant when the advertisers who practice these methods will see their folly as evidenced in the alienation of the patronage of the intelligent, and therefore the largest practitioners of the country."

We sincerely hope that "*The Georgia Practitioner*" will stick to a policy of strictly ethical advertising, and we also sincerely trust that the definition of "ethical" will not be reconstructed by the editorial management of *The Practitioner*.

To destroy disease
germs, disinfect
with Platt's
Chlorides

IN an address on Pulmonary Tuber-
culosis read at the State Medical
Association, Waco, Texas,
Professor David R. Fly, A.M., M.D.,
stated: "The chief medium of con-
tagion is the atmosphere impregnated
with dry particles of sputum expecto-
rated upon sidewalks, flooring, bed
or clothes, etc. It is obvious, then,
that those engaged in making beds,
sweeping and dusting rooms occupied
by tuberculous patients, are most ex-
posed. This danger, however, can
be materially lessened by sprinkling
the rooms with a solution of Platt's
Chlorides, one part to ten of water."

The cuspidor should be washed
out daily with boiling water, and a
mixture of one part Platt's Chlorides
and four of water kept constantly in
it to receive the sputum. The
patient's clothing should be kept by
itself, and thoroughly boiled when
washed.

FORMULA—A combination of the saturated solutions of Chlo-
ride Salts proportioned as follows: Zn 40 per cent., Pb 20
per cent., Ca 15 per cent., Al 15 per cent., Mg 5 per cent.
K 5 per cent.
